OUR AFFILIATES PHYTOS BIOSCIENCES SDN BHD

Phytos Biosciences Sdn Bhd (Phytosbio) is a plant tissue culture laboratory based in Subang Jaya, Selangor, Malaysia. The laboratory was founded in the second-half of year 2012 as a subsidiary R&D laboratory under Revongen Corporation. Phytosbio started with humble beginning as a R&D and small scale production lab specialising in ornamental aquatic plant and pitcher plant. We supplied our tissue culture plantlets to domestic aquariums and nurseries.

After a year, Phytosbio expanded their lab facilities to cater larger production scale. The expansion has increased the production capacity from 50,000 to 200,000 explants. Since mid-year of 2014, Phytosbio has been driving their research effort in optimization of Paulownia clones in Malaysia climate and have succeeded in producing RevoTropix Paulownia clones and plantlets.

Mr. Choo Wee Kean Lab Manager

More than 10 years experiences in plant propagation and conservation technology, Mr. Choo obtained his Bachelor's Degree in Science Management and Master's Degree in Plant Biotechnology studies from Universiti Kebangsaan Malaysia. Mr Choo heads our tissue culture and seedling company, Phytos Biosciences. There are 5 full time tissue culturists working under him.

Mr. Lai Ah Kow Farm Manager

Mr. Lai has more than 30 years experiences in various type of farming projects throughout his tenure working on his own farm in Lukut, Negeri Sembilan. He is the farm manager for UpPlantation since we started the Paulownia project. Under Mr Lai, there are 6 full time workers and there is plan to increase the worker numbers when more projects been initiated.

WHO WE ARE AFFORESTATION BUSINESS

Amid a growing sense of crisis regarding the global environment such as global warming and deforestation, Green Afforestation International Network Sdn Bhd (Gain-Green) is established with the aim to lead the paradigm shift to wood usage gained from sustainable timber supplies via afforestation.

Paulownia tree is a fast growing, multipurpose and valuable hardwood tree which is profitable due to fast growth, high yield rate and regeneration ability. It has been carefully selected for plantation and expected to make contribution for afforestation and remarkable profits with commercialization and sale of Paulownia wood.

MISSION

01

To establish forest inventory through sustainable land-use practices and methodologies contributing to economic, social and environmental benefits.

02

To converge dual gains of yielding timber solutions while providing carbon sequestration.

03

To satisfy the interest of the stakeholders by delivering positive outcome and revenue growth.
